

This 0.8mm pitch connector is developed for the car audio industry and is able to compensate for misalignment of up to 0.5mm on all three directions of X, Y and Z axes between the plug and receptacle when they are mating.

Features

- **0.8mm pitch, 35-circuits and 10.5mm stacking height**

The pitch and circuit number are designed to meet miniaturized multifunctional car audio and navigation equipment.

- **Compensates for misalignment**

To make the assembly process at customers' site easier, misalignment of 0.5mm on X, Y and Z axes will be compensated for.

- **Realized current rating of 1.3 Amps**

Realized 1.3A of current rating by having selected a high conductivity material for the contact.

- **Applicable to automatic surface mounting technology**

By providing a suction cap on the plug this embossed tape packaging connector series is applicable to automatic surface mounting.
